The Painted Range

Painted plates are supplied with etch-primed face plates and can be painted in the same colour as a room making them as unobtrusive as possible. They are coated with a universal primer, which is suited to all paint finishes, however we recommend using eggshell, as it is durable and can be easily cleaned and provides a smooth finish

For the Painted switch, there is a choice of rotary dimmer, dolly (toggle) or rocker switches. These can be supplied in Brass, Brushed Brass, Nickel Silver, Stainless Steel or Antique Bronze.

Painted sockets are available with black or white inserts and come with radius or square edge corners.

Painting Instructions

Before painting, remove the plate from the insert and lay on a flat surface (a piece of clean A4 paper is ideal). Using a small roller, apply two to three coats of your desired paint. A clear matt varnish can be used as a top coat to protect against marks and blemishes.

Ensure the plate is completely dry before fitting to the wall.

Available in:

Dolly Switch
Rotary Dimmer
Button Dimmer
Rocker Switch

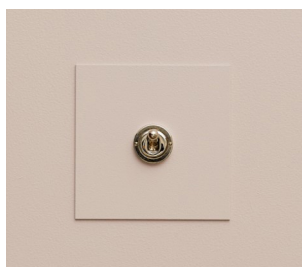

A full range of socket outlets are available, including power outlets, European sockets, telecom and data, audio and visual, fused connection

General Information

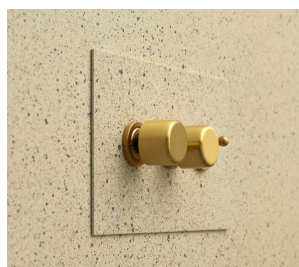

- All switches conform to BSEN 60669-1:2018. 13amp sockets conform to BS1363-2:2016 +A1: 2018, 2amp and 5amp sockets conform to BS546:1950
- Single plates measure 86mm x 86mm and double plates measure 146mm x 86mm
- All Forbes & Lomax switches and sockets require British standard 35mm deep flush wall boxes, but we recommend 47mm for ease of installation
